## Hot Iron:

- The Hot Iron was designed to give investment casting a tool to suit the needs of a specific job.
- A variety of tips help the user achieve the goals they are trying to reach.
- If a tip is not available just purchase a blank and shape it yourself.

## Changing Tips:

- Only remove tips when the iron is cold.
- Using pliers to remove the tip may cause damage to the tip as well as the iron.
- After time the shaft of the iron may become contaminated with foreign metal making tip changes harder. Using sand paper or abrasive pads on the iron shaft will remove the material.

If we may be of further assistance, please do not hesitate to contact us.
